

# Get energized

**for NYC Public Schools first Climate Action Day  
on **Wednesday, December 6****

**Did you know?** In New York City, almost 70% of greenhouse gas emissions come from energy used in buildings. With over 1,300 school buildings in NYC, students and families have an opportunity to make a BIG impact.

That's why our first ever Climate Action Day is all about energy!

On December 6, you'll learn about fun, relevant, and creative ways that YOU can help decrease energy use in your school community, and beyond.

During this energy-themed Climate Action Day, join with other students across NYC as we all work to build a better future.

Together, we can make a difference!

**[schools.nyc.gov/ClimateActionDays](https://schools.nyc.gov/ClimateActionDays)**

**There are two ways we can lower greenhouse gas emissions from energy use in our schools:**

**1**

Reduce the amount of energy that we use each day, and

**2**

Use more clean and renewable forms of energy instead of fossil fuels.
