

# Don't Waste Time!

## Get ready for NYC Public Schools next Climate Action Day on **Wednesday, February 7**

Did you know? According to a 2017 study, 86% of waste generated in our schools can be composted or recycled! (NYC Department of Sanitation)

That's why on February 7, students will learn about fun, relevant, and creative ways to reduce, reuse, and recycle in their school community and beyond.

During this waste-themed Climate Action Day, join with other students across NYC as we all work to build a better future.

Together, we can make a difference!

There are two ways we can reduce waste in our schools:

- 1 Prevent waste in the first place! Use only what you need and find ways to reuse materials.
- 2 Properly sort items for recycling and composting to reduce what we send to landfill. By the end of the 2024 school year, all K-12 NYC Public Schools will have Curbside Composting service!
